

## Sentinel Platform Integration

This document guides you through integrating INTEGRA with the Sentinel monitoring platform.

Pre-requisites:

- Satel INTEGRA control panel
  - Satel ETHM-1 Plus module
  - WAN connection
  - Laptop running DLOADX software connected to INTEGRA control panel
  - Sentinel platform IP address, port number and account number
- 

1. Navigate to **Data** → **Reporting** → **Monitoring Stations**
  2. Click **Reporting - ETHM**
  3. Click **Station 1 only**
  4. Under "**Monitoring Station 1**"
    - a. Set **Reporting Format** to **SIA (full)**
    - b. Set **ETHM/GPRS Server** to the IP address supplied by Sentinel
    - c. Set **ETHM/GPRS Port** to the port supplied by Sentinel
    - d. Set **IP format** to **SIA-IP**
    - e. Type the Sentinel account number into **Identifiers 1** and **Identifiers Sys.**
  5. Navigate to the **SIA-IP** tab in the same window.
  6. Tick **Send MAC address** and **Send timestamp**
  7. Write the data to the panel and test the communication path
